Commissioner's performance and quality framework

Introduction

1. The Scottish Information Commissioner (Commissioner) considers it important that his office performs its statutory functions and duties to a high standard, meeting the needs and, where practicable, the expectations of people in Scotland exercising their FOI rights.
2. Quality assurance is the system by which we measure, report on and achieve continuous improvement in the quality of our work. Performance management is the system by which we monitor and report on organisational outcomes.
3. The annual performance and quality framework provides a mechanism against which performance and quality can be assessed and reported, internally and publicly. It is supported by internal systems which ensure that we can identify and monitor how individual performance contributes to organisational outputs.
4. In developing and defining our quality measures and the performance framework, the Commissioner recognises that a holistic approach is needed. To achieve our ultimate aims for the delivery of a quality service, the organisation will need to take into account the inter-dependencies of a range of stakeholders and a range of activities.
5. At the time of approving this framework, the office premises are temporarily closed due to the impact of the COVID-19 pandemic and business continuity arrangements are in place. As a result of this, there have been changes in the services we are able to provide and the way in which we provide them. The impact of the COVID-19 pandemic has been taken account of in preparing this Performance and Quality Framework 2021-22 and this framework will continue to be kept under review during the financial year.

Quality aims

6. Good quality for the Commissioner is:
 - (i) Professional, courteous, and understandable communication that provides accurate and helpful advice and information to a range of stakeholders. Providing information about the Commissioner, access to information legislation and good practice and signposting to other relevant organisations. Demonstrating that we are actively informing and pursuing activity that contributes to openness and the proactive dissemination of information in Scotland.
 - (ii) Robust decisions on applications that are the result of fair and proportionate investigations. Decisions must be delivered in good time, accessible to the requester and authority, and contribute to the positive development of good FOI practice in Scotland.
 - (iii) Demonstrating that our monitoring, promotion, assessment of practice and interventions are improving the FOI experience for requesters and authorities.
 - (iv) Operating as efficiently as we can, ensuring we are accountable for how we plan, manage and utilise our resources.

Performance and Quality Framework 2021-22

7. The P&QF is set out below and covers a detailed list of targets and Key Performance Indicators (KPIs), the frequency with which each will be reported upon and where to find the relevant information on our website.
8. Our Annual Report for the reporting year will also provide commentary on our performance against a number of the targets and KPIs.
9. The functional areas denoted in the P&QF are:
